EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Frederick Bailey on 10/08/2008. The application has been amended as follows:

Claim 1 (Amended): A method for maintaining scroll position in a web user interface, comprising:

using a JavaScript to listen for an event triggered in response to a browser unloading the web user interface;

operating the set scroll position function in response to a right click action in a scrollbar of the web user interface to present a menu including a set position option;

appending a pair of scroll coordinates to a URL associated with the web user interface in response to operation of a set scroll position function in the browser;

receiving a browser request for a URL associated with the web user interface; generating a script for resetting the web user interface to the selected scroll position in response to the browser request containing the pair of scroll coordinates;

adding the script to a response to the browser request;

automatically scrolling a browser to the selected scroll position in response to the script; and

advancing the web user interface to the selected scroll position in response to each occurrence of the event including at least one of opening, reloading or refreshing the web user interface or opening a hyperlink in the web user interface,

wherein in response to the operation of the set scroll position function setting a vertical scroll position a horizontal scroll position is automatically set and in response to the set scroll position function setting a horizontal scroll position the vertical scroll position is automatically set.

Claim 12 (Amended): The method of claim 10, further comprising:

listening for the triggered [[unload]] event; and
appending the pair of scroll coordinates to the URL in response to detecting the triggered [[unload]] event.

Claim 15 (Amended): A system for maintaining scroll position in a web user interface, comprising:

a processor;
a set scroll position function operable on the processor, wherein the set scroll position function includes:
a data structure to translate a selected scroll position in the web user interface to a pair of scroll coordinates in response to operation of the set scroll position function;
and

a data structure to advance the web user interface to the selected scroll position in response to each occurrence of an event including at least one of opening, reloading or refreshing the web user interface or operation of a hyperlink in the web user interface wherein the set scroll position [[data]] function comprises a JavaScript to listen for an unload even and to translate the scroll position to the pair of scroll coordinates, wherein the pair of scroll coordinates are appended to a URL associated with the web user interface in response to operation of the set scroll position function, wherein in response to the operation of the set scroll position function setting a vertical scroll position a horizontal scroll position is automatically set and in response to the set scroll position function setting a horizontal scroll position the vertical scroll position is automatically set.

Claim 30 (Amended): A device comprising:

at least one input/output device;
a storage device; and
a processor, the processor providing a web user interface, the web user interface comprising:
a scroll feature to scroll the web user interface to a selected position in at least a horizontal or a vertical direction;
a set scroll position feature displayable in the web user interface to set or lock the selected scroll position;

appending a pair of scroll coordinates to a URL associated with the web user interface in response to operation of the set scroll position feature; and

a preset scroll position feature, the preset scroll position feature:

receiving a browser request for a URL associated with the web user interface;

generating a script for resetting a browser to a preset scroll position in response to the browser request containing a pair of scroll coordinates;

adding the script to a response to the browser request; and

automatically scrolling the browser to the preset scroll position in response to the script,

wherein in response to the operation of the set scroll position feature setting a vertical scroll position a horizontal scroll position is automatically set and in response to the set scroll position feature setting a horizontal scroll position the vertical scroll position is automatically set.

Claim 36 (Amended): A computer-readable medium comprising one from the group consisting of an electronic medium, a magnetic medium, an electromagnetic medium and a semiconductor medium, having computer executable instructions stored therein, the instructions when executed causing a processing device to perform:

translating a selected scroll position in the web user interface to a pair of scroll coordinates in response to operation of a set scroll position function;

appending a pair of scroll coordinates to a URL associated with the web user interface in response to operation of the set scroll position feature;
advancing the web user interface to the selected scroll position in response to each occurrence of an event including at least one of opening, reloading, or refreshing the web user interface of operation a hyperlink in the web user interface;
receiving a browser request for a URL associated with the web user interface;
generating a script for resetting the web user interface to the selected scroll position in response to the browser request containing the pair of scroll coordinates;
adding the script to a response to the browser request; and
automatically scrolling a browser to the selected scroll position in response to the script,
wherein in response to the operation of the set scroll position feature setting a vertical scroll position a horizontal scroll position is automatically set and in response to the set scroll position feature setting a horizontal scroll position the vertical scroll position is automatically set.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: The prior art of record taken alone or in combination does not teach or suggest the claim limitation: "appending a pair of scroll coordinates to a URL associated with the web user interface in response to operation of a set scroll position function in the browser." Though the Symonds reference teaches saving scroll coordinates in response to the submission of

a form, it does not teach or suggest appending the scroll coordinates to a URL in response to the operation of a set scroll position function.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to OMAR ABDUL-ALI whose telephone number is (571)270-1694. The examiner can normally be reached on Mon-Fri(Alternate Fridays Off) 8:30 - 6:00 EST.
